International Collaborations in Nuclear Theory: Theory for open-shell nuclei near the limits of stability

Scott K. Bogner (NSCL/Michigan State University), Morten Hjorth-Jensen (NSCL/Michigan State University) and Jason D. Holt (TRIUMF)

May 11-29, 2015, Michigan State University and FRIB/NSCL

Program first week May 11-15 2015

Time	Monday	Tuesday
9.30am-10.30am	Andreas Ekstrom (ORNL/UTK)	Takaharu Otsuka (Tokyo)
	Constraining the Description of the Nuclear Interaction	
10.30am-11am	Coffee break	Coffee break
11am-12pm	Heiko Hergert (MSU)	Alexandra Gade (MSU)
	Effective interactions and operators from IM-SRG	Nuclear spectroscopy of exotic i
12pm-2pm	Lunch	Lunch
2pm-3.30pm	Discussions	Discussions
$3.30 \mathrm{pm}\text{-}4 \mathrm{pm}$	Coffee break	Coffee break
4pm-6pm	Discussions	Discussions

Program second week May 18-22 2015

Time	Monday	
9am-10am	Jimmy Rotureau (ORNL/MSU)	
	Towards optical potentials from coupled cluster theory	
10am-11am	George Papadimitriou (ISU)	
	Structure and Reactions of nuclei using complex energy formalisms	Struct
11am-11.30am	Coffee break	
11.30am-12.30pm	Alexander Volya (FSU)	
	Shell-model approach to nuclear clustering	$R\epsilon$
12.30pm-2pm	Lunch	
2pm-3.30pm	Discussions	
3.30pm-4pm	Coffee break	
$4 \mathrm{pm}\text{-}6 \mathrm{pm}$	Discussions	

Program third week May 25-29 2015

Time	Monday	
9.30am-10.30am	Luigi Coraggio (INFN, Naples)	
	A new double-step procedure for the derivation of effective shell-model hamilt	
10.30am-11am	Coffee break	
11am-12pm	Toshio Suzuki (Tokyo)	
	Evaluation of nuclear weak rates relevant to astrophysical applications	
12pm-2pm	Lunch	
2pm-3.30pm	Discussions	
3.30pm-4pm	Coffee break	
4pm- 6 pm	Discussions
